

One of the basic and very important freedoms we have is the right to our privacy and everytime my phone rings and it is an outsider trying to solicit something from me he is stealing my time, my privacy (how does he get my number when it is unlisted)and who knows what else. Please support New Jerseys law. Now we get phone calls from overseas to solicit they are not even from this country and they call all hours and 7 days a week. Where will it all end!
